EWTN is now transmitting on a new transponder!
ACTION REQUIRED by Thursday September 10th!

Dear Valued Affiliate,

EWTN was just notified that Intelsat has accelerated their cessation of all services on Transponder 5 on Galaxy 15. If you have already re-tuned to our new Transponder 23 on Galaxy 15, then you and your customers will be unaffected. If you have not, **we urge you to switch no later than Thursday September 10, 2020** to avoid losing EWTN, EWTN HD, EWTN Español, EWTN Español HD and EWTN Canada!

To avoid any service interruptions to your customers, we are asking you to please forward this notice IMMEDIATELY to the appropriate engineering staff at your company. They can conveniently go to our dedicated web landing page with all of the necessary technical specifications and answers to frequently asked questions (www.ewtn.com/transponder). They are also welcome to contact EWTN's Engineering Affiliate Hotline (1-205-271-2911).

We sincerely apologize for the inconvenience of this notice but, because of the unexpected news we received from Intelsat (which has shortened our original dual illumination period), we are sending you this updated information.

Once you complete the frequency change, we ask that you (or a person you designate) please notify us via e-mail at: g15@ewtn.com. Be sure to include your company name, address and contact person.

Thank you for your assistance with this transition.

Sincerely,

EWTN Affiliate Relations Department
